- ❖ Check Activities Reviews.
- ❖ Check Activities Participants.
- ❖ Review Users.
- ❖ Ask about the company values and chatbot functionalities.

We will now dive a little deeper into these features, showcasing their value and their importance for the platform as well as its users.

## **Create Activities:**

At BeAlive we believe that you should never struggle to create a new activity or be innovative in the description. You just need to tell our assistant about it, and he will do it for you.

Your activity may range from purely recreational to volunteering. Alventure will guide you step-by-step through the process. Asking about age group, relevant interests, location, a brief description and how many vacancies are available.

Everything else will be taken care of by you!

It will be easier than ever. With us setting up events is simple and efficient.

## **Search for an Activity:**

BeAlive revolutionizes activity-finder platforms by providing intelligent and personalized activity recommendations that resonate with your unique preferences and current context, enhancing how you find activities to do in your free time with our intuitive, real time conversational AI assistant, Alventure.

With Alventure you will be able to search for activities that align with your interests so that you can have more fun and meaningful experiences. You will also receive a message from Alventure containing all the information about the activities that are relevant to you.

Searching for something to do in your spare time was never so interactive and easy.

## **Make a Reservation for an Activity:**

For you to experience the many activities that we have on our website, you first need to make a reservation for the activity that most interests you.

It is a bummer when we want to do something, but people are not available. With BeAlive that will never happen, when you want to reserve an activity Alventure will first see if that activity is available, if it is the host of the activity will receive your request and accept you or not. If your reservation is accepted you will be able to see the activity on your calendar.

Making a reservation is straightforward and ensures you have the best experience possible. With BeAlive, the process is smooth and reliable.

If the activity you want is not available anymore you do not need to worry, with us there is always an adventure just around the corner.

## **Check the Activities Reservations**

In BeAlive we want people to create but also know the state of the activities.

With Alventure all hosts will be able to check reservations given to their activity, messages, contact information and a rating of users making a reservation, so that they can keep track of their activities and manage them in the best interests of the participants.

The hosts being the backbone of our company we want them to have the easiest experience.

## **Accept Activity Reservations:**

We believe that people are happy when they do what they love with the people that share the same interests and visions.

The hosts can accept reservations from people with the same interests and passions. With that reservation you will be able to get the contact of that person, a message made by that person at the moment of reservation and the rating of that person. By providing you with that information you will make a greatly informed choice about accepting or rejecting that specific person for your activity.

This process will allow you to carefully select individuals for your activity, then you will be sure that they share your passions and align with your vision.

We ensure a harmonious and enjoyable experience for everyone involved, making sure you will have new connections and create memorable moments that will last a lifetime.

## **Reject Activity Reservations:**

In BeAlive we believe that no one should do things against their will.

As a host you will never have someone that does not align with you in your activity. You will always be able to reject people who do not share the same interests as you as it will not be beneficial for any of the participants if there are people who do not align with the environment.

Stronger communities are built when we have people at our side that we identify with.

## **Delete Activities:**

In BeAlive we understand when people have other things to do, and they cannot be present.

Alventure does not hold hard feelings, as a host if you are not able to be present in your activity or for any other reason you wish to cancel it, you are able to do so before it happens. When it's done Alventure sends you a message confirming it was deleted.

This will guarantee that both the hosts and participants can manage their schedules easily. This simple process and the confirmation message will help you maintain an uplifted spirit with stress-free experience.

## **Review Activities:**

In BeAlive we strongly suggest that people have a voice and share opinions.

With Alventure you will be able to review activities where you participated. After you complete the activity Alventure will enable you to rate the host of the activity you went to in order to improve the forthcoming activities.

Do not forget to always write a review, it helps the host and the other people on the website, as written feedback is much more insightful than a simple rating.

## **Check for Activity Participants:**

In our website the hosts will always have information regarding their activities.

Alventure will enable hosts to be always able to check the participants in their activities and as participants can rate the host of the activities, hosts can also rate the participants if they wish so.

In this way we will ensure safety on the website and in the activities presented as everyone will have their score public.

## **Review users that participated**

We think that you should never need to bite a bullet, **express** your opinion and increase your experience!

With Alventure you will be able to rate each one of the people that went to your activity. Later the ratings will be useful, they will be another metric in the moment of accepting the people into future activities.

This aspect will make the whole ambience trustworthy, encouraging participants to engage thoughtfully.

## **Company Information and Chatbot Functionalities:**

In BeAlive we want our community to know who we are and what we do to have a stronger and better community.

If you are ever confused about our chatbot or even our company, Alventure is here to help you, with a simple question of how things work or their functionalities you will be updated and your doubts will be cleared.

We are here for you, and we want you to feel at home, do not hesitate to ask any question.
