

BeAlive Webpage

At BeAlive, our goal is to ensure that you always have the best experience possible. To this end, we have developed our website with a customer-centric vision in mind. For that reason, we have carefully divided it into intuitive and helpful pages:

❖ **Registration Page:**

This page is where your journey with BeAlive will start, upon joining our website for the first time you will be asked to create an account. Creating an account is a requirement for our platform, because to ensure truly tailored activity recommendations we must first get to know you a little bit, the account creation process will allow us to do exactly that.

❖ **Login Page:**

Once you have created your account, the login page will be where you can always log into your account and start having fun. You will obviously also be able to log out from your account, if you ever wish to do so.

❖ **Chatbot Page:**

This is the real star of our webpage, the heart of the platform. The chatbot page is where users will get to interact with the Alventure chatbot for a variety of reasons. While interacting with Alventure, users will be able to ask questions regarding company information, such as company values and mission.

The true value of Alventure, comes from its ability to control the entire platform from simple text chat communication with users. From user messages, Alventure can create new activities and remove cancelled ones, give hosts valuable information for activity management and users can to make updates to their personal information, among many other crucial features. But perhaps, the most impressive feature of Alventure is that it can produce truly

personalized activity recommendations from simple conversations with users.

❖ **Chatbot Instructions Page:**

The Chatbot Instructions page is crucial for newer users of our platform who are keen to maximize their enjoyment and benefit from our service. This page will include the best ways for users to engage with Alventure. This page will contain guidelines showcasing how users can make themselves understood and get the most out of Alventure. This page will be more useful for newer, less-experienced users of the platform. However, experienced users may still find tremendous value in checking this page occasionally, to stay on top of any new features or updates that may be available for Alventure or the BeAlive service.

❖ **Calendar Page:**

The calendar page provides a tremendous level of organizational prowess to the platform. This page will allow users to quickly and effortlessly check their future activities, making it easy to stay on top of your scheduled activities, but also to ensure that appropriate timings can be found for new reservations. Furthermore, it gives hosts a simple and centralized way of ensuring their activities do not overlap. This brings tremendous value to an ever-changing society where it's easy to forget things if we don't have quick and easy access to information.

❖ **About Us Page:**

The about us page contains some general information about BeAlive and the Alventure chatbot and serves primarily as an introduction of the company and its technologies to newer users who may want to learn a little bit more about us.

❖ **Account Page:**

In this page you will be able to just in a few clicks, update your information account, we believe that your interests can change throughout the time, or even your email, and password. Other information, for safety purposes, cannot be updated, so be careful when creating your account. In this page you will also have the opportunity to log out from your account, and comeback later.

Each page is designed with simplicity and usability in mind. We're confident that our platform will make searching for activities as well as activity management better than they have ever been.

At BeAlive, we focus on you. We are bound to you, our customers. We offer the possibility of finding new meaningful, hyper-personalized experiences that bring you closer to others. Whether you want to discover a new adventure or simply connect with people, we are confident you will have fun.
